## Data Creation Range:

2012 - 2022

## Created by:

AFCARS data, U.S. Children’s Bureau, Administration for Children, Youth and Families

## Content:

Spreadsheets

## Use Cases

- What is the relationship between children in the foster care system and the prevalence of mental, behavioral, developmental, and emotional conditions among them?
- Target potential interventions as well as the potential change needed to better aid children who are a part of the foster care system.
- Find association between chronic health conditions and children within the foster care system.

## Nutrition Facts

Nationwide foster care trends and mental, behavioral, developmental, and emotional conditions data set
